## **Lights up the dark**

### **Weicon Tools LED Work Light**

Tool manufacturer Weicon Tools has developed a special accessory for its wire strippers to illuminate dark working environments – the LED Work Light.

#### **New work light**

Electricians should only work on de-energised systems when dealing with electrical installations, cables or devices. When working, for example, on a construction site, there is often insufficient lighting. The new LED Work Light is the perfect solution for such situations.

The Weicon Tools LED Work Light ensures good illumination of the working environment, thus supporting the precise use of tools. Three brightness levels ensure optimum visibility and safe working in dark working environments.

The small, compact light illuminates the stripping blades of the wire strippers in a targeted manner, thus directly illuminating the area of application. In this way, the work light also contributes to occupational safety during electrical installation. The LED light has been specially designed to meet the needs of professional users and is used in both trade and industry.

#### **Easy to use**

The LED Work Light can be easily attached to any of the Weicon Tools wire strippers. To do so, simply remove the printed plastic cover from one side of the tool and press the light into the designated holes using the two mounting points. This ensures that the work light stays securely in place and cannot fall off or slip.

The lamp is switched on by pressing the switch. Pressing the switch several times selects the brightness level (three levels with 50, 127 or 248 lumens). To switch off the lamp, press and hold the on/off switch. The LED Work Light is 48 mm long and weighs 15 g. The LED light is IP65-rated, making it both dust-proof and splash-proof.

## **Long service life**

The light is powered by a strong, rechargeable 180 mAh lithium battery. After 40 minutes of charging, the lamp can provide around 2 hours of light at medium brightness. Battery life varies depending on the brightness level selected. The LED Work Light comes with a charging cable and is available in red and black.
